

Divison Ventilation Declaration for substance of concern in articles

SCIP is a database for information on substances of concern in articles as such or in complex objects, products. Starting January 5, 2021, companies placing articles on the EU market need to provide information to the database on those articles which contain substances of very high concern (SVHC) in a concentration above 0.1% w/w (weight by weight). The database is meant to provide waste operators with information about hazardous substances in the waste they process so that materials can potentially be recycled and reused in the production of new articles.

Lindab's work

The Lindab Group's products and solutions should be the customer's first choice in terms of both quality and environment. We stand for a long-lasting protection of the environment and is aware of its responsibility towards the coming generations. We will work with continuous improvements to create safe products and solutions that simplify construction for our customers and offer the best solutions from both a social and a product lifecycle perspective. Products and solutions should contribute to buildings becoming more energy efficient and environmentally friendly.

The Lindab Group comply with, and when possible exceed, requirements from applicable legislation, regulations, codes of practice and other quality and environmental requirements applicable to the Lindab Group. To secure compliance with REACH and SCIP suppliers of articles are assessed and asked to share information about SVHC.

Many suppliers have certified that the products and/or articles supplied to the Lindab Group are free from SVHC. Any products containing an article with SVHC in a concentration above 0.1% w/w will be registered in the SCIP database as soon as enough information is received. As established under Article 33 of REACH the product recipients will be informed if any article contains more than 0.1% w/w.

Contact your salesman to get information about the status of the products and/or articles you supply from the Lindab Group.
